Check for recalled RATs at home

Visitors to all Brightwater sites are currently being asked to have a Covid-19 Rapid Antigen Test (RAT) before entering a site and wear a mask while on site.

You may have heard that several brands of RATs have been withdrawn from the market in Australia following a review by Therapeutic Goods Administration.

Please check if you have any of the following brands at home and stop using them immediately:

- CovClear by Medi-Stats,
- NowCheck by Life Bioscience,
- Covifind by Safe Interact,
- PCL COVID-19 Rapid by Haemokinesis
- BD Veritor System for Rapid Detection test from Becton Dickinson

Thank you for your patience while we navigate increased community transmission of Covid-19 in our community.
